Summary

Motivated and detail-oriented Artificial Intelligence and Data Science student with hands-on experience building full-stack, AI-powered web applications using React.js, Node.js, and generative AI APIs. Skilled in Python-based data analysis and visualization, with a strong foundation in problem-solving, debugging, and end-to-end product development. Eager to apply both software engineering and AI/ML skills to real-world challenges.

Work Experience

Python Developer Intern Sep 15, 2025 – Oct 15, 2025
Owl AI (Overload Ware Labs AI) *Virtual / Remote*

- Completed a one-month virtual internship gaining hands-on experience in real-world AI and software development tasks.
- Worked independently under deadlines to implement Python-based solutions and enhance technical proficiency in programming, debugging, and automation.
- Emphasized remote collaboration, problem-solving, and adapting to flexible work environments.

Projects

CareerLens AI | *React.js, Node.js, Express.js, MongoDB, Gemini AI*

- Built a full-stack AI-powered career platform that analyzes a user's profile and resume to generate personalized career insights.
- Implemented resume analysis using Gemini AI to extract skills, identify gaps, and recommend targeted improvements.
- Designed personalized career roadmaps and skill recommendation modules to guide users toward relevant learning paths.
- Developed an AI career assistant chatbot to answer user queries and provide real-time guidance on career decisions.

MediAI | *React.js, Node.js, Express.js, MongoDB, Gemini AI*

- Built a full-stack healthcare platform connecting patients with doctors through an intuitive discovery and booking system.
- Implemented separate patient and doctor dashboards to manage appointments, medical history, and consultations.
- Integrated JWT-based authentication to ensure secure login and role-based access for patients and doctors.
- Used Gemini AI to power a specialization-guidance feature that helps patients identify the right type of doctor for their symptoms.

Historical & System Metrics Dashboard | *Python, matplotlib, psutil, Power BI*

- Created a performance monitoring system using Python (matplotlib, psutil) and Power BI.
- Designed interactive dashboards to visualize CPU, memory, and system usage trends.
- Enabled real-time tracking and historical comparison of metrics to support data-driven system analysis and optimization.

Library Management System | *Python, Tkinter, MySQL (DBMS Project)*

- Designed and developed an interactive Library Management System using Python (Tkinter).
- Integrated database functionalities to efficiently handle book records, user details, and issue/return transactions through an intuitive and user-friendly interface.

Education

Bachelor of Engineering (B.E.) – Artificial Intelligence & Data Science 2024 – 2027
Savitribai Phule Pune University, Pune *Pursuing*

Diploma in Engineering 2021 – 2024
PCET's Pimpri Chinchwad Polytechnic, Pune *Percentage: 85.05%*

Secondary School Certificate (SSC) – Class 10th 2020
Maharashtra State Board *Percentage: 88.80%*

Skills

Programming Languages: Python, C, JavaScript, MySQL
Tools & Technologies: Power BI, Excel, Tkinter, Matplotlib, Pandas, Tableau
AI & Emerging Tech: Agentic AI, Generative AI, Data Visualization
Soft Skills: Problem Solving, Team Collaboration, Remote Work, Adaptability
